

Daily Home Screening for Students

Parents: Please complete this short check each morning before your child leaves for school and if you check yes to any one of the boxes below please call your child's school.

SECTION 1: Symptoms

If your child has any of the following symptoms it indicates a possible illness that may decrease the child's ability to learn and also put them at risk for spreading illness to others. We ask that your child return to school **after symptoms have improved** and after being fever-free for 24 hours without the use of fever-reducing medication.

	Temperature of 100.0 degrees or higher or has body aches
	Sore throat or rash
	New uncontrolled cough that causes difficulty breathing (for a child with chronic allergic/asthmatic cough, a change in their cough from what you usually see)
	Diarrhea, vomiting, or abdominal pain
	New, severe headache, especially with a fever

SECTION 2: Close Contact/Potential Exposure

If you answer yes to any of the following items this puts your child at risk for spreading illness to others. We ask that you call your child's school and ask to speak with your school's COVID Point of Contact.

	Has your child had close contact (within 6 feet of an infected person for at least 15 minutes) with a person with COVID-19?
	Is anyone living in your house currently in quarantine or isolation for COVID?
	Has your child recently been tested for COVID and you are still waiting for results?
